I like the idea of a periodic newsletter when news content warrents.

The Mid-Term Elections are critical. We need to do everything possible to position Maine as an important state that brings increased Republican influence to Washington.

Fund raising needs stated purpose.

I will be very blunt so please read and understand I am just being honest. It is often difficult to vote Republican because the candidates are not effective and they don't energize the party or even themselves. It is time for the local GOP Committees to step up and make a difference by being involved in choosing the right candidates to run, not just a warm body, which is one of the reasons we don't have the majority in the legislature. Too many people that want to run, decide to run and then do it and they are not the right candidates. When choosing the candidates, you should think of them as employees because the voters are "hiring them" to represent us in the legislature. Would you hire those who are currently running for election from the Republican party? Some of them are running year after year, they are lukewarm at best and continue to come in last. They don't know how to debate or even to campaian. Just look at the last
